Frontend Development

- HTML
- CSS
- JavaScript
- ReactJS
- Bootstrap
- TailwindCSS
- jQuery
- React Native

CAREER OBJECTIVE

Dynamic Full Stack Developer with extensive experience in developing web and mobile applications. Proven track record of delivering high-quality projects on time, showcasing exceptional productivity, punctuality, and rapid learning of new technologies. Skilled in both front-end and back-end development, optimizing performance and enhancing user experience

PROFESSIONAL EXPERIENCE

Software Developer SEP 2023 - Present Raspberry info systems, Chennai

- Developed and maintained a comprehensive Hotel Management System using PHP, **CodeIgniter 3/4**, and JavaScript, supporting room booking, guest management, billing, and reporting functionalities.
- Implemented modules for reservation management, check-in/check-out workflow, inventory tracking, and staff roles & permissions.
- Integrated third-party **APIs** for SMS/email notifications and payment gateway for secure online transactions.
- Migrated legacy systems from **CI3** to **CI4**, improving code maintainability, modularity, and security.

PROJECTS

Point of Sale (POS) Mobile Application Technologies: React Native, PHP, MySQL

- Developed a **cross-platform** mobile Point of Sale (POS) application to streamline sales operations for small and medium businesses. The app enables real-time inventory management, **sales tracking**, and digital receipts.
- Built the front-end using **React Native** for both Android and iOS platforms, ensuring responsive and user-friendly UI.
- Designed and implemented **RESTful APIs** in PHP to handle business logic and data exchange between the mobile app and backend.
- Integrated **MySQL** database for storing product information, transaction records, and user data securely.

Backend Development

- PHP
- Node JS
- Express.js

Database Management

- MongoDB
- MySQL
- PostgreSQL

SOFT SKILLS

- Problem-Solving
- Teamwork
- Adaptability

LANGUAGES

- English
- Tamil

Sky Room – Room Booking Web Application

Technologies: PHP (CodeIgniter 3), MySQL, HTML, CSS, JavaScript

- Developed Sky Room, a web-based room booking platform designed for hotels, to manage room availability, reservations, and customer data efficiently. The system enables users to search, book, and manage room reservations seamlessly.
- Built and maintained the web application using PHP with CodeIgniter 3 (CI3) framework following MVC architecture
- Designed and implemented CRUD operations for rooms, bookings, users, and admin management.

Store and Inventory Management System

Technologies: PHP (Ci4), MySQL, jQuery, AJAX

- Developed a web-based Store and Inventory Management System to streamline the purchase process, track inventory levels, and manage stock movement for small and medium enterprises. The system provides real-time insights into stock levels, supplier purchases, and inventory usage.
- Designed and implemented purchase order and stock management modules, including **stock in/out**, supplier management, and item categorization.
- Built interactive dashboards and reporting tools to show current stock, low inventory alerts, and purchase history.

E-commerce Web & Mobile Application

Technologies: React, React Native, Node.js, Express.js PostgreSQL

- Built responsive **UI/UX** for web and mobile, ensuring seamless cross-platform user experience.
- Enabled features like user authentication, product search, cart management, and order tracking
- Integrated **Razorpay** payment gateway for secure online payments, handling orders, **invoices**, and real-time transaction status.
- Deployed the web and mobile backend on **VPS** for production, ensuring high availability and performance.

TECHNICAL CERTIFICATES

- Full Stack Development at UK Info Tech .
- Internship in Web Development.
